Private Passenger Automobile Insurance

OCT 4 '84

1983

VOLUME I

PREPARED BY:

STATISTICAL SECTION
MISSOURI DIVISION OF INSURANCE
P. O. BOX 690
JEFFERSON CITY, MISSOURI 65102

AUTOMOBILE INSURANCE

Pursuant to H. B. 503, now 374.450 RSMo, the Division of Insurance has undertaken to collect data on automobile coverage that is auditable and not "trended", "adjusted", or otherwise adapted by any intermediary statistical agency. The geographic and demographic base for this data collection effort has been the "zip code" as assigned by the U. S. Post Office. Because this is a totally committed effort, 100% of the insurance experience in each zip code is now available. This is in contrast to the statistical agencies which only collect data from a select group of insurers, each agency only having data for some percentage of the market.

There are several goals in this collection of data:

- (1) To enhance fair competition among the insurers of automobile by providing each:
 - (a) their market share in each zip code and what type of business they have specialized in for each zip
 - (b) of the smaller writers with the same kind of data base (by zip code) that the larger writers for competitive reasons have been maintaining for some time.
- (2) To monitor the private passenger automobile insurance cancellation practices of insurers in certain geographical areas (379.110).
- (3) To monitor uninsured vehicles and shared market vehicles (Section 379.465) for possible legislative review.
- (4) To test the validity of automobile territories which are currently based upon the average experience of the whole territory. By the use of zip code, a territory can be subdivided into small subunits and thereby it can be seen if one subunit is a better risk than another and what variation of loss transpires in a territory. This process will improve the accuracy of territorial boundaries and prevent the unfair discrimination of arbitrary territorial boundaries that may currently exist (Section 379.470). The data developed will aid insurers in reviewing their territories with the goal of making them fairer and more reasonable for all policyholders.

INTRODUCTION

In the current phase of data collection, the Division of Insurance has collected earned car counts for each quarter for both collision and comprehensive coverage.

An earned car count is the count of insuring a private passenger automobile, including vans and light pickups, for three months, or one quarter of a year. Collision coverage is physical damage protection for the vehicle, i.e. if the vehicle must be repaired due to an accident on the road, the cost will be met by the collision coverage. Comprehensive coverage is also for the vehicle to be repaired, but is caused by loss occurring usually while the vehicle is parked, such as hail damage.

In this phase of data collection, all companies or groups with more than 500 exposures per quarter must report all data for all the zip codes in Missouri. We only require that the companies report exposure counts for collision and comprehensive at this time, but we do anticipate the implementation of Phase III (Losses for collision and comprehensive) to begin in the near future.

Tables follow which treat exposures or car counts for collision and comprehensive coverages separately. Be sure in making comparisons or drawing conclusions that you compare collision tables to other collision tables, etc.

In order to understand the tables contained in this report, we have provided some aids on the following pages:

1. Brief descriptions have been given of the policy types which, generally speaking, range from the most desirable, broadest coverage, to the least desirable, Joint Underwriting Association business, the state-mandated pooling arrangement.
2. A system of symbols has been developed by the Insurance Services Office for the automobile industry; these symbols represent the value of the vehicle when originally purchased and provide an index of the amount of insurance being extended by the insurer for collision and comprehensive coverages.
3. For use when determining average amount of insurance, a midpoint value for each range was established. This midpoint value was determined after consultation with several industry people.

PRIVATE PASSENGER AUTOMOBILE

Description of Terms

Policy Type

<u>Type</u>	<u>Description</u>
A	<u>Preferred Family</u> - A policy form at least equal to Family Automobile ordinarily offered only to risks meeting high acceptance standards at rates less than the industry average.
B	<u>Standard Family</u> - A policy form at least equal to Family Automobile ordinarily offered to risks categorized as better than average at rates at or near the industry average.
C	<u>Standard Basic</u> - A policy form of the Basic Automobile type ordinarily offered to risks evaluated as average or slightly below average at rates at or slightly above the industry average.
D	<u>Nonstandard Basic</u> - A policy form of the Basic Automobile type ordinarily offered to risks evaluated as poor or below average at rates considerably greater than the industry average.
E	<u>JUA (Joint Underwriting Association) Basic</u> - A policy written under Section 303.200 RSMo.

<u>Symbols or Ranges</u>			
<u>Range</u>	<u>Symbols</u>	<u>Description</u>	<u>Midpoint Values</u>
1	1 - 4*	\$0 - \$ 3,700	\$ 2,750
2	5 - 7*	\$ 3,701 - \$ 8,000	\$ 5,500
3	8 - 10*	\$ 8,001 - \$12,500	\$10,150
4	11 - 12*	\$12,501 - \$17,500	\$14,000
5	13 - 14*	\$17,501 and above	\$20,000

* - ISO Symbols for Value Range of Private Passenger Automobile

TOTAL STATEWIDE COUNT
BY POLICY TYPE AND RANGE

Report 6 shows the statewide aggregate counts of automobiles reported for the quarter by all the companies together. This report shows the counts by type and range with total each way. For example, in collision, the total number of cars insured in Range 1 for less than \$3,700 was 348,433. The total number of Policy Type E, or JUA policies, was 623.

AVERAGE AMOUNT OF INSURANCE

By the use of a midpoint value (see Page), the average amount of insurance was developed for several different categories: zip code, sectional center, and statewide.

To demonstrate how this midpoint value was used, we have calculated the statewide average amount of insurance. By looking at Report 6 (see Page), we can take the totals in each range, multiply them times the midpoint value of that range, sum these products, and divide by the total statewide count. The results are listed below:

Collision Coverage

<u>Count in Range</u>	<u>Midpoint Value</u>	<u>Total Value in Range</u>
348,433	\$ 2,750	\$ 958,190,750
1,074,460	\$ 5,500	\$5,909,530,000
179,962	\$10,150	\$1,826,614,300
40,083	\$14,000	\$ 561,162,000
25,081	\$20,000	\$ 501,620,000
<u>1,668,019</u>		<u>\$9,757,117,050</u>

$\$9,757,117,050 / 1,668,019 = \5850 = Average Amount of Insurance for Collision Coverage Statewide.

In other words, the average car value for those cars insured for collision-loss by the companies reporting was \$5850.

Comprehensive Coverage

<u>Count in Range</u>	<u>Midpoint Value</u>	<u>Total Value in Range</u>
442,609	\$ 2,750	\$\$1,217,174,750
1,130,193	\$ 5,500	\$\$6,216,061,500
185,256	\$10,150	\$\$1,880,348,400
41,265	\$14,000	\$\$ 577,710,000
25,893	\$20,000	\$\$ 517,860,000
<u>1,825,216</u>		<u>\$10,409,154,650</u>

$\$10,409,154,650 / 1,825,216 = \5703 = Average Amount of Insurance for Comprehensive Coverage Statewide.

In other words, the average car value for those cars insured for comprehensive-loss by the companies reporting was \$5703.

On the pages following are other Average Amount of Insurance tables.

III (a)

AVERAGE AMOUNT OF INSURANCE EARNED

By Policy Type By Zip Code

Report 13 shows the average amount of insurance by policy type and is ranked by zip code. There are two Report 13's - one for Collision Coverage and one for Comprehensive Coverage.

III (b)

AVERAGE AMOUNT OF INSURANCE

By Policy Type By Sectional Center

This table (Report 15) shows the average amount of insurance for each policy type for each sectional center in the state. A sectional center is composed of all the zip codes having the first three digits in common.

III (c)

AVERAGE AMOUNT OF INSURANCE

By Sectional Center
By Average Amount of Insurance

All Policy Types Together

The following table shows the average amount of insurance for all policy types within a zip. The ranking for this report is done first by sectional center--so that all 630's, 631's, etc. are grouped together--and then by zip codes within that sectional center running from the zip with the highest average amount of insurance to the lowest average amount of insurance.

By looking at Report 17, you can see that in Sectional Center 630, Zip Code 63078 had the highest average amount of insurance (\$7,825); in Sectional Center 631, Zip Code 63156 had the highest average amount of insurance (\$9,280); in Sectional Center 633, Zip Code 63367 had the highest average amount of insurance (\$6,780); etc.

UNINSURED VEHICLES

One of the most valuable statistics that can be derived from this collection of data on insured vehicles is an estimate of the percentage of uninsured vehicles in each zip code. This is an estimate of the effectiveness of the voluntary and "pooled" markets in serving each market segment, here equivalent to the zip code. From the attached Report 23, we have calculated that statewide the percent of vehicles insured for collision coverage is 51.9% and for comprehensive coverage is 56.8%

Through the cooperation of the Missouri Department of Motor Vehicles, computer programs were written which compared the count of vehicles insured against the count of registered vehicles in each zip code.

Report 23 shows the difference between the number of autos, vans, and light trucks (which are usually insured as autos) registered through the Department of Motor Vehicles and the number of insured vehicles which the writers of private passenger automobile insurance reported for the same quarter. (See Note). Official cars used for local, county, state, federal, or other political subdivisions, are not included in the DMV records. The DMV files indicate the count of license plates garaged in each zip as of the midpoint of the quarter. The insured count indicates the number of cars insured for the quarter as garaged in each zip code. The zip code of principal place of garaging, not the billing address, was the theoretical base for reporting of insurance data.

When reviewing these reports, the reader should remember that:

- 1) The insurance data is for comprehensive or collision coverage only; no liability insurance data is included.
- 2) Ninety-five percent of the insurance market by premium volume is represented

NOTE: In a few instances, there were more autos insured than registered. This is probably due to the insurance company's records using a post office box address and the DMV's records showing the registration at the place of principal garaging, or vice versa.

IV (a)

POLICY TYPE VS. REGISTERED VEHICLES

Report 24 measures the percentage of policy type within a zip against the total number of registered vehicles in that zip. In addition, it also shows the percentage of uninsured vehicles in that zip.

By using Report 6, which is a statewide report by policy type and range, we have calculated the statewide percentages. Below is a table showing what percentage of vehicles registered were Policy Type A, B, C, D, or E and what percentage was uninsured.

Percentage of Registered Vehicles
By Policy Type and Uninsured

Statewide

<u>Policy Type</u>	<u>Total Count</u>	<u>Total Registered</u>	<u>Percent</u>
<u>Collision</u>			
A	1,399,996	3,212,956	43.57
B	239,792	"	7.46
C	16,187	"	0.50
D	11,421	"	0.36
E	623	"	0.02
Uninsured	1,544,937	"	48.08
<u>Comprehensive</u>			
A	1,518,389	3,212,956	47.26
B	276,900	"	8.62
C	17,290	"	0.54
D	12,023	"	0.37
E	614	"	0.02
Uninsured	1,387,740	"	43.19

Report V

The data base that has developed from the reporting of data for quarter 3 of 1983 representing 95 percent of the private passenger automobile insurance market is consolidated here as Report Five.

This shows the aggregate count of the industry for both comprehensive and collision coverages and from this data base any insurer or penetration of an agent or agency can be developed by zip code.

This data base is the source of all the preceeding analytical tables in this report. The Report Five data base can be viewed in Volume II of this publication.
